

Freightair

Freight Forwarding by Air, Sea and Road

Freightair handles all aspects of international freight forwarding. Established since 1983 Freightair has experienced staff throughout their offices and is an approved listed agent and has direct links to UK Customs.

One of the most important factors whilst dealing in transport is to understand the terms of trade. These are known as Incoterms and are generally agreed between the seller and buyer in advance of delivery.

Our Mission

Freightair is totally committed to servicing clients in the fulfillment of international freight forwarding by providing global operations to the highest standards.

Our experienced team can provide comprehensive freight forwarding services across all areas including:

- Documentary Credit Services.
- Export Packing.
- UK Haulage.
- Hazardous Goods Shipping.
- Bonded Warehouse.
- TIR Services.
- Import / Export Services.
- Personal Effects.
- Chamber of Commerce Documentation.
- Track & Trace / Post Flight Information.
- Insurance Services.

Air Freight Made Easy

As world trade evolves, airlines are now traveling the world to destinations that only a few years ago were remote. Freightair has made transporting your air freight as easy as possible.

There are different ways of sending air freight depending on the urgency of your goods. Freightair will discuss the process to you and recommend the most suitable and cost-effective way to send your freight.

Direct Airline

There are many airlines serving the same destination and our expertise in this field helps choose the quickest and most cost-effective way for your goods to arrive safely and on time.

Consolidation

The most economical way to transport goods by air is to have your goods shipped together with other cargo. As the name suggests by consolidating the goods with other shipments it can reduce the cost. Whilst costs can be lower the frequency of flights can be less, so this method of transport should only be considered if you have a longer delivery window.

Charter Flights

Freightair can organise a dedicated flight to transport your goods anywhere in the world. Whilst being an expensive option it gives virtual guaranteed arrival of your goods. Departure Times of flights can be altered to suit clients requirements.

Courier & Door to Door

Freightair offer a courier service for both import and export shipments worldwide. Providing Express and Economy options using courier services directly and also for larger weights and volumes utilising our network of overseas agents.

Cross Trade

Using our network of partners Freightair can arrange everything required to send goods from your supplier direct to your client.

Sea Freight That's Smooth Sailing

Similar to our air freight services Freightair handle all aspects involved with the shipping of goods by sea be it Import or Export, FCL or LCL.

Freightair can effect customs clearance of imported goods at any UK port and offer facilities such as:

- Loading containers
- De-Vanning containers
- Merchant haulage
- ERTS Bonded Warehouse
- Customs Documentation
- Direct Link to Customs
- Packing
- Insurance
- Competitive Rates

Freightair work with some of the biggest international shipping companies and niche service providers to offer a cost-effective and reliable solution for your sea cargo. Sourcing the best routes and quickest transit times available, Freightair will safely and efficiently transport any size of shipment, from single pallets (LCL) all the way up to a full container load (FCL).

Full Container Load (FCL)

Containers can be positioned to load directly from your door and delivered directly onboard the next available vessel with short close out periods before the next sailing. Depending on size, large quantities of goods can be securely loaded in to 20 or 40' containers, placed on flat racks or in to open top containers.

Less Container Load (LCL)

Probably the most common method of transporting goods around the world. Shipments are consolidated at local warehouse facility before being loaded into containers and delivered to the Shipping Line. This may well be cost-effective however it is the slowest method both on Export and Import since longer closeouts on Export and time taken on arrival at destination where goods have to be devanned (unpacked) before being able to be delivered to the Consignee.

Abnormal Cargo Loads

Special Equipment can be sourced to handle OUT of GAUGE cargo such as conventional/break-bulk and RO-RO shipments.

The Road To...Everywhere

As an alternative to air/sea freight by utilising our fleet of vehicles for Express, full / part load, and groupage deliveries thereby giving clients the benefit of cost savings whilst ensuring deadlines are met without compromising reliability.

- Dedicated Collections/Deliveries
- Abnormal loads
- UK/European Distribution

Whether you need a small van or huge artic, need economy or time critical delivery a solution for you.

Freightair can help with one-off or regular deliveries. Our dedicated team make sending pallets as painless as possible for you, giving you complete peace of mind that your shipment will arrive intact and on time.

Road Freight – UK / European

From departures to door-to-door delivery to web-based tracking, Freightair offer a comprehensive, highly dependable platform that functions seamlessly within both international and domestic landscapes. Working within your specific industry guidelines to optimise efficiency and save you money and time.

Freightair offers an unparalleled road service that ensures your freight reaches its destination with the utmost efficiency and speed. Goods can be transported via road throughout the uk, Europe and beyond.

Road Freight – Specialist Services

Freightair provide a full range of specialised services too, including refrigerated (with single or multi-temperature transportation), hazardous goods, wide/low loads, cranes and hiabs. Freightair can also offer express delivery service.

Other Services

Documentary Credit Services

Freightair are proud Chamber of Commerce members and our experienced staff can advise on all kinds of documentation.

Export Packing

Freightair offer competitive rates for packing to your required specification. Specialist packing for heavy machinery, valuable or fragile items, can also be undertaken.

UK Haulage

By the very nature of our business, Freightair has to collect and deliver cargo around the UK. Utilising our partners' extensive trunking and overnight delivery network ensures fulfillment.

Hazardous Goods Shipping

Freightair are qualified to handle the transportation of goods by air, sea, and road.

Courier & Door to Door

Freightair can offer a courier service for both import and export shipments worldwide. Freightair offer an Express Courier Service at competitive rates. For larger weight or volume shipments, Freightair, using their network, can also offer a more cost-effective door to door service.

Warehousing & Bonded Warehousing

Freightair can offer clients facilities to store their goods, tailored to their specific needs.

Personal Effects

Freightair can handle personal effects consignments. Savings can be made by sending goods as freight instead of paying Excess Baggage Charges to the airlines.

Track & Trace / Post Flight Information

Tracking and tracing for both import and export is a vital part of any modern freight forwarding business. In recent years, this has been enhanced by the internet and many airlines have track and tracing facilities within the public domain. However, Freightair has extensive tracking and tracing facilities for all airlines and for our Consolidators which cannot be accessed within the public domain, and where often passwords and codes are required.

Insurance Services

Freightair are able to offer marine insurance cover for most kinds of cargo at competitive rates.
